Light Structure designed by Peter Hamburger and Ingo Maurer resembles a floating sculpture of six acrobatic tubular LED lights suspended in midair connected by thin bars. What makes Light Structure unique is that the lines that suspend each tubular LED light bar also provide power without any additional connector or wires. Inspired by the way energy travels in nature, Light Structure is available as a suspension or table light.

**DIMENSIONS:**

- **Length:** 52.00
- **Width:** 52.00
- **Diameter:** 52.00
